

IP Professional Services

IP.com's team of searchers will help you clear product features, perform patent searches in support of prosecution, detect patent infringement, find prior art to aid in answering demand letters, and assess opportunities in the patent landscape. They are experts in advanced search technologies and many have practiced engineering with some of the world's leading corporations, providing them with first-hand experience in their field.

Consult with our experts

Our team is skilled in advanced search technologies, classification searching, and industry-specific terminology. They will help you clear product features, perform patent searches in support of prosecution, detect patent infringement, find prior art to aid in answering demand letters, and assess opportunities in the patent landscape.

Working with our professional services team reduces the time it takes you to perform accurate analyses, and provides you with results that are personalized and actionable. Our U.S.-based team is compliant with International Traffic in Arms Regulations (ITAR) and is trusted by the world's largest, most recognizable R&D organizations and patent offices.

Why IP.com?

IP.com's Professional Services team is refreshingly different from most prior art search practices in the industry. We do not participate in any project off-shoring, and we have built a multidisciplinary team capable of researching any technology area. Our analysts have been, at one point in their careers, practicing engineers or scientists for some of the most notable corporations in the world.

What are the benefits?

Clients use our services because we are an agile team able to respond to most requests within hours. Clients use our services for:

- Invention Review Triage (early stage ideation/novelty search)
- Pre-filing patentability searches
- Product clearance/freedom to operate
- Patent validity and invalidity searches
- Patent landscaping
