

ENHANCED TVR

FASTER KNOCK-OUTS. GREATER INSIGHT.

A smarter take on the classic knock-out report.

The Enhanced Technology Vitality Report (TVR) **reimagines a critical innovation tool**. The knock-out report—also known as a patentability screen—is one of the most practical tools in an innovation leader’s toolkit. It answers a deceptively simple but vital question: **“Is this idea likely to be patentable?”**

Fast, early-stage insight prevents costly dead ends. Whether you’re filing, refining, or deciding to publish, this kind of triage keeps invention pipelines moving efficiently.

A modern approach to patentability screening

The Enhanced TVR from IP.com delivers the same early-stage clarity as a knock-out report—but with modern precision, speed, and context-aware intelligence.

Built on our Dual-Engine AI, the Enhanced TVR distills complex data into concise, relevant IP guidance.

- Clear overview of your invention’s core concepts
- Deep, context-aware search of relevant prior art
- Flags novelty blockers and areas of potential conflict
- Delivers fast, focused go/no-go insight

ACCELERATE THE IMPOSSIBLE

EMPOWERING KEY ROLES AT CRITICAL MOMENTS

Focus your innovation power where it matters most. Knowing an idea's novelty early can make all the difference. The Enhanced TVR delivers fast, actionable insight—helping teams reduce risk, avoid wasted effort, and prioritize only the most promising ideas for protection or publication.

IP Counsel and Legal Teams

Quickly assess disclosures to determine if they merit further investment or filing—without relying on outside counsel for every review.

Patent Review Committees

Prioritize limited filing budgets with confidence. Use Enhanced TVRs to compare submissions and flag ideas that need refinement.

R&D and Product Leaders

Avoid investing in ideas that may face strong prior art. Use Enhanced TVRs to validate novelty and reduce downstream risk early.

Startups, VCs and Commercialization Teams

Strengthen pitch decks and licensing strategies by showing novelty-backed IP potential—before you commit to patenting cost..

Purpose-Built for Clarity and Speed

Focused, Contextual Insight

Go beyond keyword noise. The Enhanced TVR uses concept-level search to deliver highly relevant prior art—so you can evaluate novelty with confidence, not guesswork.

Structured, Actionable Analysis

Each report includes relevance statements that explain how cited prior art maps to the invention's key concepts or claims—bringing greater clarity to complex content.

Results in Minutes, Not Days

Don't let long review cycles stall momentum. Get early-stage patentability clarity fast—seamlessly integrated into your workflows.
